

SECTION 1 — INTRODUCTION

The Authority invites proposals from qualified vendors for the supply, implementation, and support of an enterprise proposal automation platform. Vendors must respond to every requirement in Sections 3 through 7, indicating full compliance, partial compliance, or non-compliance, with supporting evidence. Non-responsive submissions will be disqualified.

SECTION 2 — BACKGROUND

The Authority processes approximately 400 tenders annually across 12 departments. The current process is manual, relying on spreadsheets and shared drives, resulting in inconsistent compliance tracking and slow turnaround. The Authority seeks a platform to automate document analysis, response drafting, and compliance tracking end to end.

SECTION 3 — SECURITY REQUIREMENTS

- 3.1 The vendor MUST hold a current ISO 27001 certification and provide the certificate number and validity period.
- 3.2 The vendor MUST provide evidence of an independent SOC 2 Type II audit completed within the last 12 months.
- 3.3 All data MUST be encrypted at rest and in transit. Describe the encryption standards and key management approach, including support for customer-managed keys.
- 3.4 The solution MUST support single sign-on via SAML 2.0 or OIDC with the Authority's Azure Active Directory.
- 3.5 Describe the role-based access control model, including custom roles and audit logging capabilities.
- 3.6 The vendor MUST describe its penetration testing regime and remediation timelines.
- 3.7 Describe your vulnerability management program, including scanning frequency and patch SLAs for critical findings.
- 3.8 Confirm whether multi-factor authentication is enforced for all user accounts.

SECTION 4 — DATA GOVERNANCE REQUIREMENTS

- 4.1 All Authority data MUST reside within the State of Qatar or, subject to approval, within the GCC. Specify available hosting regions and residency guarantees.
- 4.2 Confirm compliance with Qatar Law No. 13 of 2016 on Personal Data Privacy Protection and describe your data protection governance.
- 4.3 Describe your backup and disaster recovery capabilities, including RPO and RTO commitments and testing frequency.
- 4.4 Confirm whether an on-premises or sovereign deployment option is available for classified workloads.
- 4.5 Describe your sub-processor disclosure and change-notification practices.
- 4.6 Confirm data retention and deletion practices upon contract termination.

SECTION 5 — TECHNICAL REQUIREMENTS

- 5.1 The solution MUST provide a documented REST API for integration with the Authority's existing systems.
- 5.2 Describe available native integrations, specifically with Microsoft 365 and SharePoint.
- 5.3 The solution MUST support automated user provisioning and deprovisioning via SCIM.
- 5.4 Describe the platform's uptime commitment and the service credit regime applicable to SLA breaches.
- 5.5 Confirm API rate limits and describe how the platform scales under peak concurrent load.
- 5.6 Describe the system architecture's approach to high availability and failover.

SECTION 6 — IMPLEMENTATION AND SUPPORT REQUIREMENTS

- 6.1 Describe your implementation methodology, typical timeline for a 300-user deployment, and the project team you would assign.
- 6.2 Describe the training approach, including Arabic-language support and post-go-live adoption tracking.
- 6.3 Describe your support tiers, response times for priority-1 incidents, and escalation

procedures.

- 6.4 Provide details of at least three comparable reference implementations, preferably within the GCC region.
- 6.5 Describe your product roadmap process and how customer feedback is incorporated.
- 6.6 Confirm the availability of a dedicated technical account manager for enterprise accounts.

SECTION 7 — COMMERCIAL REQUIREMENTS

- 7.1 Provide your pricing model, including subscription tiers, implementation fees, and any volume or multi-year discounts applicable to a 300-user deployment.
- 7.2 Confirm the company's financial standing, years in operation, and total staff dedicated to delivery.
- 7.3 Confirm standard payment terms and whether local-law contract governance is available.
- 7.4 Confirm professional indemnity and cyber liability insurance coverage levels.
